Our Team Of Licensed, Professional Technicians

Clean, Renewable, American Made

UltraBio™ Performance Blended Bio-Heating Fuel is a Sippin Energy exclusive that offers improved performance, increased reliability, and greater efficiency. **UltraBio™** bio-fuel is a blend of 100% soybean bio-fuel, and our ultra-low sulfur, high performance heating oil. **The combination...Unbeatable at any price!**

UltraBio™ Key Features:

- **UltraBio™** burns cleaner and more efficiently, saving you money by using less fuel.
- **UltraBio™** is environmentally friendly and virtually free of sulfur which reduces emissions.
- **UltraBio™** is a renewable resource, grown right here in the USA!
- **UltraBio™** is provided at no additional cost.

Soybeans are the American-grown crop used to make clean burning, renewable UltraBio™

The Sippin Energy Products bulk plant facility plays an important role in maintaining quality control as well as ensuring an uninterrupted supply of fuel throughout the year. Our bulk storage terminal is one of the most modern and well-maintained anywhere in Connecticut and is always kept impeccably clean and free of any water and sediment.

It's Everywhere You Need It To Be!

Our Propane Bulk Terminal

Why Choose Propane?

Having propane at your home allows for the convenience of integrating all your appliances and heating needs and relying on a single source of reliable fuel. Propane is also:

- **Clean:** Propane is an approved clean fuel listed in the 1990 Clean Air Act.
- **Abundant:** America produces more than enough propane to meet demand. In fact, the U.S. is propane's leading producer!
- **Affordable:** Domestic propane production is expected to continue to grow rapidly, keeping downward pressure on average propane prices.

Generators

Sippin Energy Products is capable of providing the complete installation of trusted Generac® generators. A generator is essential to any homeowner during a power outage and provides worry-free power for up to weeks on end to keep your lights on, showers warm, and food fresh. Here are some additional facts about generators:

- **Electrical Loads:** Generators are sized to handle each home's unique demands including well pumps, refrigerators, heat & hot water, and lighting.
- **Quality Of Power:** A high-quality generator will produce electricity at a constant voltage which is critical for sensitive electronics.
- **Noise & Location:** A modern generator is reasonably quiet and our professionals will position it in the optimal location, away from main living areas.
- **Fuel Source:** Sippin Energy recommends propane for a generator's fuel because we can install the tanks and lines, and you have control of your fuel supply.
- **Automatic Operation:** Sippin Energy installs every generator with an ATS (automatic transfer switch) so it starts automatically within seconds of a power outage.
